

ASSESSMENT DESCRIPTION

WESMAN PERSONNEL CLASSIFICATION TEST (VERBAL REASONING)

This assessment measures an individual's ability to understand concepts framed in words. More specifically, it measures both the ability to reason through analogy and the perception of verbal relationships. The numerical component measures the ability to perceive quantitative relationships and operate with ingenuity. The Wesman Personnel Classification Test is useful for evaluating an individual's potential for success in positions that require skill in manipulating verbal concepts, such as in a sales, management, or executive-level position.
