Focused Development

Personal Development Plan

Your employees can use their DISC, PIAV, or TriMetrix assessment results to complete this packet. The exercises in this workbook are designed to foster more effective communication in an individual's professional and personal areas of life. This tool is particularly helpful for implementing the data from the assessments into everyday life.

RxCDS

Our RxCDS are designed to provide practical exercises and interactive learning that targets the skills your employees need to develop. They can be used in a CD player for audio learning, or on the computer for visual & audio learning. See a full list of CD topics and view samples on our website by going to our "Products" page, then clicking on "Coaching & Development"

Employee Development

The tough economy has forced many companies to cut back on new hires and begin to focus on developing current employees. While this may be an economically wise decision, it may have a negative impact on the people involved if not done correctly. Rather than forcing "square pegs into round holes", Performance Excellence takes a developmental approach that capitalizes on the natural strengths and potential of an individual, as well as identifies and develops targeted areas for growth.

We've compiled resources that we are confident will help you and your employees in their drive to achieve 'excellence' in all they do. You can find these resources on our website:

- Assessments
- Coaching Sessions
- Customized Development Packets
- Interactive Online Development System
- Managing Performance Priorities
- Online E-learnings (FREE!)
- Personal Development Plan (FREE!)
- RxCDS
- Seminars (Communication, Conflict Resolution, Motivation)
